Current as of 30 April 1976

TM 5-4120-222-24P, 22 May 1969, is changed as shown on the reverse  
of this page.

By Order of the Secretary of the Army:

Official:

FRED C. WEYAND  
General, United States Army  
Chief of Staff

PAUL T. SMITH  
Major General, United States Army  
The Adjutant General

Distribution:

To be distributed in accordance with DA Form 12-25C, Organizations  
maintenance requirements for Air Conditioners: 18,000 BTU, Compact.

# INSTRUCTIONS

SHOWN BELOW ARE THE LATEST CHANGES TO NATIONAL STOCKNUMBERS (NSN) WHICH AFFECT ITEMS IN THE BASIC MANUAL. THE DATA IS ORGANIZED AS FOLLOWS: THE "FROM" COLUMN WILL SHOW THE OLD NSN, IF ONE WERE ASSIGNED. WHERE THE MANUFACTURERS PART NUMBER AND MANUFACTURERS CODE APPEAR IN "FROM" COLUMN REFER TO INDEX FOR LOCATION WITHIN MANUAL. THE "TO" COLUMN SHOWS THE NEW NSN. IN THE "FIG" COLUMN, THE NUMBER OF THE FIGURE WHICH ILLUSTRATES THE ITEM IDENTIFIED BY THE NSN IS SHOWN. THE "ITEM" COLUMN PIN-POINTS THE ITEM NUMBER OF THE SELECTED FIGURE WHICH IS IDENTIFIED BY THE NSN. IF FIGURE AND ITEM NUMBER ARE BLANK REFER TO THE INDEX FOR LOCATION WITHIN MANUAL. THE LAST COLUMN, "TM", IDENTIFIES THE TECHNICAL MANUAL IN WHICH THESE CHANGES SHOULD APPEAR. PEN-AND-INK CHANGES MAY BE MADE BY POSTING THE NEW DATA TO THE PARTS LISTINGS AND TO THE INDEX.

## SECTION I

### INTRODUCTION

#### 1. Scope

This manual lists repair parts required for the performance of organizational, direct support, general support maintenance of the air conditioner.

#### 2. General

a. The repair parts list is arranged as follows:

(1) Individual parts and major assemblies are listed alphabetically by item name within the numbered functional groups.

(2) Assembly components and subassemblies are indented and listed alphabetically by item name under major assemblies.

b. This Repair Parts and Special Tools List is divided into the following sections:

(1) *Prescribed Load Allowance (PLA)*—Section II. A consolidated listing of repair parts quantitatively allocated for initial stockage at the organizational level. *This is a mandatory minimum stockage allowance.*

(2) *Special Tools, Test and Support Equipment*—Section III. A list of special tools, test and support equipment authorized for the performance of maintenance at the organizational level (Not Applicable).

(3) *Repair Parts*—Section IV. A list of repair parts authorized for the performance of maintenance at the organizational level.

(4) *Repair Parts*—Section V. A list of repair parts authorized for the performance of maintenance at the direct support, general support, and depot level.

(5) *Special Tools, Test and Support Equipment*—Section VI. A list of special tools, test and support equipment authorized for the performance of maintenance at the direct support, general support level (Not Applicable).

(6) *Federal Stock Number and Reference Number Index*—Section VII. A list of Federal stock numbers followed by reference numbers, appearing in all the listings, in ascending alphanumeric sequence cross-referenced to index number.

#### 3. Explanation of Columns

The following provides an explanation of columns in the tabular lists in sections II through VI.

a. *Source, Maintenance, and Recovery Codes (SMR).*

*Note.* Common hardware items known to be available in Army supply channels will be a maintenance codes only. Source codes, Recovery codes, and Maintenance Allowances will not be a to this category.

(1) *Source Code.* Indicates the status and source for the listed item. Source used are:

Code	Explanation
P	Applied to repair parts which are stocked or supplied from DSA/GSA or Army supply system, and authorized for use in indicated categories.
M	Applied to repair parts which are not procured or stocked but are to be manufactured at indicated maintenance categories.
A	Applied to assemblies which are not procured or stocked as such but made up of more units, each of which carry individual stock numbers and descriptions and are procured and stocked and can be assembled at indicated maintenance categories.
X	Applied to parts and assemblies which are not procured or stocked, the mortality which is normally below that of the replaceable end item, and the failure of which should result in retirement of the equipment from the supply system.
X1	Applied to repair parts which are not procured or stocked, the requirement for which will be supplied by use of the next assembly or components.
X2	Applied to repair parts which are not procured. The indicated maintenance category for such repair parts will attempt to obtain them through cannibalization; if not obtainable through cannibalization, such

Code	Explanation
	parts will be requisitioned with supporting justification through normal supply channels.
C	Applied to repair parts authorized for local procurements. If not obtainable from local procurement, such repair parts will be requisitioned through normal supply channels with a supporting statement of nonavailability from local procurement.
G	Applied to major assemblies that are procured with PEMA (Procurement Equipment Missile Army) funds for initial issue only to be used as exchange assemblies at DSU and GSU maintenance level. These assemblies will not be stocked above DSU and GSU level or returned to depot supply level.

(2) *Maintenance Code.* Indicates the lowest category of maintenance authorized to install the listed item. The maintenance level codes are:

Code	Explanation
O	Organizational maintenance
F	Direct support maintenance
H	General support maintenance
D	Depot maintenance

(3) *Recoverability Code.* Indicates whether unserviceable items should be returned for recovery or salvage. Items not coded are expendable. Recoverability codes are:

Code	Explanation
R	Applied to repair parts and assemblies which are economically repairable at DSU and GSU activities and normally are furnished by supply on an exchange basis.
T	Applied to high dollar value recoverable repair parts which are subject to special handling and are issued on an exchange basis. Such repair parts normally are repaired or overhauled at depot maintenance activities.
U	Applied to repair parts specifically selected for salvage by reclamation units because of precious metal content, critical materials, high dollar value reusable casings or castings.

(4) This column also lists, below the SMR code, an index number for each item in ascending numerical sequence, which is used to locate items in the publication when the Federal stock number and/or reference number is known.

*b. Federal Stock Number.* Indicates the Federal stock number for the item.

*c. Description.* Indicates the Federal item name and any additional description of the item

required. A part number or other reference number is preceded by the applicable five-digit Federal supply code for manufacturers in parentheses. Repair parts quantities included in the kits, sets, and assemblies are shown in front of the repair part name.

*d. Unit of Issue.* Indicates the unit used as a basis for issue, e.g., ea, pr, ft, yd, etc.

*e. Quantity Incorporated in Unit Pack.* Indicates the actual quantity contained in the unit pack.

*f. Quantity Incorporated in Unit.* Indicates the quantity of the item used in the functional group.

*g. Fifteen-Day Organizational Maintenance Allowances.*

(1) The allowance columns are divided into four subcolumns. Indicated in each subcolumn opposite the first appearance of each item is the total quantity of items authorized for the number of equipments supported. Subsequent appearances of the same item will have no entry in the allowance columns but will have in the description column a reference to the first appearance of the item. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The quantitative allowances for organizational level of maintenance represents one initial prescribed load for a 15-day period for the number of equipments supported. Units and organizations authorized additional prescribed loads will multiply the number of prescribed loads authorized by the quantity of repair parts reflected in the appropriate density column to obtain the total quantity of repair parts authorized.

(3) Organizational units providing maintenance for more than 100 of these equipments shall determine the total quantity of parts required by converting the equipment quantity to a decimal point before the next to last digit of the number to indicate hundredths, and multiplying the decimal factor by the parts quantity authorized in the 51—100 allowance column. Example, authorized allowance for 51—100 equipments is 12; for 140 equipments multiply 12 by 1.40 or 16.80 rounded off to 17 parts required.

(4) Subsequent changes to allowances will be limited as follows: No change in the range of items is authorized. If additional items are considered necessary, recommendation should be forwarded to U. S. Army Mobility Equipment Command for exception or revision to the allowance

list. Revisions to the range of items authorized will be made by this Command based upon engineering experience, demand data, or TAERS information.

#### *h. Thirty-Day DS/GS Maintenance Allowances.*

(1) The allowance columns are divided into three subcolumns. Indicated in each subcolumn, opposite the first appearance of each item, is the total quantity of items authorized for the number of equipments supported. Subsequent appearances of the same item will have no entry in the allowance column, but will have in the description column a reference to the first appearance of the item. Items authorized for use as required but not for initial stockage are identified with an asterisk in the allowance column.

(2) The quantitative allowances for DS/GS levels of maintenance will represent initial stockage for a 30-day period for the number of equipments supported.

(3) Determination of the total quantity of parts required for maintenance of more than 100 of these equipments can be accomplished by converting the equipment quantity to a decimal factor by placing a decimal point before the next to last digit of the number to indicate hundredths, and multiplying the decimal factor by the parts quantity authorized in the 51-100 allowance column. Example, authorized allowance for 51-100 equipments is 40; for 150 equipments multiply 40 by 1.50 or 60 parts required.

*i. One-Year Allowances Per 100 Equipments/Contingency Planning Purposes.* Indicates opposite the first appearance of each item the total quantity required for distribution and contingency planning purposes. The range of items indicates total quantities of all authorized items required to provide for adequate support of 100 equipments for one year.

*j. Depot Maintenance Allowance Per 100 Equipments.* Indicates opposite the first appearance of each item the total quantity authorized for depot maintenance of 100 equipments. Subsequent appearances of the same item will have no entry in this column, but will have in the description column a reference to the first appearance of the item. Items authorized for use but not for initial stockage are identified with an asterisk in the allowance column.

#### *k. Illustration.*

(1) *Figure number.* Indicates the figure number of the illustration in which the item is shown.

(2) *Item number.* Indicates the callout number used to reference the item in the illustration.

## 4. Special Information

a. Identification of the usable on codes of this publication are:

Code	Used on
A	Applies to air conditioner Model CE20VAL4, serial numbers 259903 through 259944; 259827 through 259880; 263104 through 264189; 280747 through 280765.
B	Applies to air conditioner Model CE20VAL6, serial numbers 283755 through 283764; 292428 through 292437; 292439 through 292445; 292447; 303326 through 303329; 303331 through 303337; 303341 through 303342; 303344; 315122; 315124; 378704 through 378706; 379843 through 379844; 401979 through 401988; 378619 through 378628; 431380 through 431385.
C	Applies to air conditioner Model CE20VAL4, serial numbers 259827 through 259902; 264148 through 264189; 280747; 280748; 280754 through 280765; 292448 through 292452; 298409; 298410; 298420 through 298438; 298439 through 298463; 298465 through 298480; 303133 through 303157; 307540 through 307701; 308223; 308225 through 308232; 339943; 339945; 339966; 410640 through 410724; 413831 through 413867.
D	Applies to air conditioner Model CE20VAL4, serial numbers 413868 through 413885; 481998 through 482027; 482033 through 482063.
E	Applies to air conditioner Model CE20VAL4, serial numbers 450442 through 450510; 485647; 485648; 502516 through 502528.
F	Applies to air conditioner Model CE20VAL6, serial numbers 432476 through 432485; 450516 through 450668; 481947 through 481962; 491990; 491991; 507464 through 507543; 516957 through 517046.

Uncoded items are applicable to all models covered in this manual.

b. Repair parts mortality has been based on 7200 hours of operation per year.

c. Parts which require manufacture or assembly at a category higher than that authorized for installation will indicate in the source column the higher category.

d. The following publication pertains to the air conditioner and its components:

TM 5-4120-222-15

Operator, Organizational, DS, GS and Depot Maintenance Manual

## 5. How to Locate Repair Parts

a. When Federal Stock Number or reference number is unknown:

(1) *First.* Using the table of contents, determine the functional group or subgroup within which the repair part belongs. This will refer to a page in the parts listing.

(2) *Second.* The illustration column of the page refers to a figure number.

(3) *Third.* Locate the figure and identify the repair parts, noting the item number.

(4) *Fourth.* Refer back to the page of the parts listing. Find the item number in the illustration column that corresponds with the figure number.

b. When Federal Stock number or reference number is known:

(1) *First.* Using the Index of Federal Stock Numbers and Reference Numbers, find the pertinent Federal stock number or reference number. This index is in ascending alpha-numeric sequence cross-referenced to an index number.

(2) *Second.* Using the Repair Part Listing, find the index number referenced in the Index of Federal Stock Numbers and Reference Numbers.

## 6. Abbreviations

ar	as required
dc	direct current
deg	degree (s)
dia	diameter
ft	foot (feet)
hp	horsepower
id	inside diameter
in.	inch (es)
lh	long (length)
lh	left hand
mtg	mounting (s)
No.	number (s)
NPT	National Pipe Thread
od	outside diameter
rh	right hand
rpm	revolutions per minute
rl	roll (s)
sh	sheet
thd	thread (ed)
thk	thick (ness)
v	volt (s)
w	wide (width)
